1. The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claims 1-10 been renumbered 1-9.

2. The drawings are objected to because draftsman report, and Figs. 1 and 2 must be labeled prior art. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

5. Claims 1-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Barcia et al view of British Patent # 1,050, 635, Grabowski et al, Kohler and Hamilton.

Art Unit: 3641

Barcia et al discloses a substantially similar device. Barcia et al lack dispensing containers, plural trays, circular tray, and plural ports. British Paten # 1, 050, 635 discloses ejecting, containers, per se. Grabowski et al disclose a system with plural trays. Kohler discloses a circular tray, while Hamilton the use of plural ports, ~~A~~ would have been obvious to a mechanic with ordinary skill in the art at the time the invention was made to provide these features to the primary reference. The motivation is to provide for a larger system with plural trays.

6. The remaining references are cited to show similar structure.

7. Any inquiry concerning this communication or earlier communications form the examiner should be directed to Examiner Bratlie whose telephone number is (703) 308-2669. The examiner can normally be reached on Mondays through Thursday from 6:30 to 5:00. Friday is the examiner's day off.
